Reporter: Mr. Bunjong Patthamalai, Director of Chiangklomwittaya School

Location: Chiangklomwittaya School, Amphoe Pakchom, Loei Province

Academic Year: 2006-2007

Abstract

Today the Thai educational management has been developed for human potentiality. This includes such things as; the body, mind, intelligence, knowledge, morality and the cultural way of life which can be happily adjusted with other people. Schools have to support, knowledge, critical thinking, morality, learning process and their responsibility to the society and developing the balance of the children's center. Therefore the reports of project results of Chiangklomwittaya School have been found to be the Model Lab school. The purpose of the study is to figure out how to approach the work and problems associated with Chiangklomwittaya School. The learning process includes the desired trait of students, participation and satisfaction of parents, and satisfaction of administrators and teachers within the educational setting of Chiangklomwittaya School.

There are four groups of samplings; administrators, teachers, students and student's parents; this is a total of 550 people. The process goes from multi-stage sampling, by using scales; this is a total of 5 papers. The papers include, questionnaires of the way to work; a learning process questionnaire; the desired trait of student's questionnaire; the satisfaction and participation to the students' desired trait; the satisfaction of administrators and teachers to the sample school. The statistics are used by analysis such as percentages, mean, and standardization

The results of the data study:

1. The condition of Chiangklomwittaya School project to be the Model Lab School following by the idea of administrators in school in different levels. Their opinions regarding the project are on the good level.
2. The condition of Chiangklomwittaya School to be the Model Lab School following the teachers' opinions in schools. Their opinions to the project are on the good level.
